Register as a packaging producer at the Swedish Environmental Protection Agency

Starting 2021, all packaging producers must register at the Swedish EPA and pay an annual enforcement fee. If you have not registered your company, please make sure to register as soon as possible.

How do we register our company?

You can register your company through our e-service or by giving power of attorney to your collection system (FTI) which then performs the registration for your company.

What information do we need to provide?

Packaging producers must provide the Swedish EPA with information about company name, contact details, personal identity number or corporate identity number and which collection system the producer uses.

E-service

When registering in the e-service, identification occurs through electronic identification (eID). For foreign parties, foreign eID is available as an alternative. Eleven European countries are currently affiliated with the eID system. If your country is not affiliated with eID, you can instead ask your collection system to make the registration for you or appoint a person with a valid eID who can register for you. More information about registration and the link to the e-service can be found here: [Registering packaging producer - Swedish Environmental Protection Agency \(swedishepa.se\)](https://www.swedishepa.se/registrering)

If you have already registered as a producer with the Swedish EPA, you can ignore this message. If you are unsure if your company is registered, log in via the e-service and check.

Please note, if you are subject to producer responsibility and do not comply with the registration provision, the Swedish EPA may order an injunction and, if necessary, an injunction with a penalty.

Best regards

Swedish Environmental Protection Agency
